1. Silent Paint Remover 33064

The Silent Paint Remover SH 1000 "SUPER LIGHT"

This is our SUPER LIGHT Silent Paint Remover™. The New Silent Paint Remover™ SH 1000 is built with fewer parts than the Silent Paint Remover™ 1100 and GRH. It is also available at less cost but still powerful for many paint, varnish or glue removing projects. The Silent Paint Remover™ SH 1000 is designed for hand held operation only.

- Super lightweight - only 3lb
- Exceptional heat transfer
- Automatic overheat protection (no reset button)
- Stationary side shields
- 1000 watt power consumption
- Heavy duty power switch and power cord
- Fixed mounted IR tubes
- No carrying case or weight bar available for this model.

2. Dryer Vent Cleaning System 33063

- Ensures Home Safety-Our dryer duct cleaning kit helps maintains the safe operation of your clothes dryer thus ensuring the safety of your home while reducing drying times and lowering utility bills.
- Easy to Use - Easily attach the dryer vent brush to your cordless drill for rotary cleaning. The included vacuum and dryer adapters allow you to use air from the dryer or vacuum to remove lint.
- Effective Lint Removal - The rotating action of the dryer vent cleaning brush and adjustable flexible rods thoroughly clean out almost every dryer vent system.
- Effective Lint Removal - The rotating action of the dryer vent cleaning brush and adjustable flexible rods thoroughly clean out almost every dryer vent system.
- Includes - 4 Long Flexible Screw-Connect Rods (3'), 1 Blockage Removal Tool, 1 Vacuum Adapter, 1 Dryer Adapter, 1 Self-Feeding 4" Auger Brush, 1 Lint Trap Brush (2 1/2" Diameter), 1 Owners' Manual

3. [Zojirushi Home Bakery Breadmaker](#) 33409

From gluten-free to conventional breads to our delicious bread mixes, we turn to Zojirushi. This bread maker features double kneading blades that knead dough more effectively and with much less user time and effort than any other appliance we've tried. We love using it to make baguettes, dinner rolls, sandwich loaves, pizzas, and more. It's as simple as putting the ingredients into the bucket, pushing "start," and coming back 90 minutes later to thoroughly kneaded, beautifully risen dough. A dedicated gluten-free cycle is designed to add extra mixing to gluten-free doughs, helping develop them so they rise and bake beautifully. All the fully programmable cycles allow you to program kneading, rising, and baking times to suit your recipe. If you're feeling creative, you can pause the bread machine after kneading and rising, then remove it and shape and bake in the oven as you please. If you choose to bake a loaf, you'll have a more traditionally-shaped horizontal loaf (like the loaves you buy from the bakery) rather than a vertical loaf. Sturdy stainless steel handles make handling and removing the pan easier than ever, and a smartly designed top heating element inside the lid gives loaves golden brown crusts.
